

10 closet organization tips, including what to do with the off-season half

Half of what's in a closet is waiting for the weather to change. Organize the half you wear by reach, store the rest clean and sealed, and keep track of which bin the parka went into.

- ☐ **Sort one category at a time: keep, donate, repair**
- ☐ **Keep this season's weekly wear at the front, hip to eye height**
- ☐ **Hang what drapes; fold knits in stacks of four or fewer**
- ☐ **Use one hanger type, only as many as the rod holds**
- ☐ **Flip every hanger backwards; check in six months**
- ☐ **Hang a donate bag inside the door**
- ☐ **Wash or dry-clean everything before packing it away**
- ☐ **Use sealed totes with a cotton layer; tissue for wool and silk**
- ☐ **Skip dry-cleaning bags; store down loose**
- ☐ **Keep bins out of the attic and off the basement floor**
- ☐ **Photograph, code and note the location of each bin**
