

Holiday decoration storage: 10 tips for Halloween, Hanukkah, Christmas and more

October to January is one long storage season. Give each holiday its own tote and lid colour, pack powered props and inflatables the way their makers say, keep wax and latex out of the heat, and photograph each tote before it closes.

- ☐ Pack indoor pieces first and first-night items last
- ☐ Give each holiday its own totes, lid colour and "first hour" box
- ☐ Wind, test, bag and label every light strand
- ☐ Dry inflatables fully; bag each with its blower, cord, stakes and tethers
- ☐ Remove batteries from every prop, timer and electric menorah
- ☐ Tape remotes and adapters inside the box
- ☐ Drain or clean the fog machine per its manual
- ☐ Wrap ornaments in tissue, one per cell; no newspaper
- ☐ Wrap the menorah's arms; stuff masks, never on foam heads
- ☐ Put foam, wreaths and garland on top; keep only unstretched webbing
- ☐ Store candles, latex, glued props, batteries and paper indoors
- ☐ Clean and seal costumes, stockings, runners and bunting
- ☐ Photograph and tag every tote before closing it
