

## 10 storage unit organization tips from people who pack them for a living

Heavy boxes low, nothing on the concrete, an aisle you can walk, labels facing you. Then the harder part: knowing which of forty boxes has the thing you came for.

- ☐ Use two box sizes; put heavy things in the small one
- ☐ Tape box bottoms and edges
- ☐ Put pallets or risers under everything; keep stacks off the walls
- ☐ Stack heavy boxes low in brick pattern, no higher than your shoulder
- ☐ Store the mattress flat in a breathable bag
- ☐ Cover furniture with blankets, not plastic
- ☐ Fill drawers and drums; label what's inside
- ☐ Keep an 18-inch center aisle; put likely-needed items up front
- ☐ Label two sides and the top with a code and name
- ☐ Leave out food, fuel, propane, solvents and pool chemicals; drain the mower
- ☐ Pick climate control based on what you're storing
- ☐ Photograph every box open and every wall before closing the door
- ☐ Share the space with everyone who has a key
